

■ ONLINE COHORT COURSE · EDITION 01 · COMPANY-FUNDED TRAINING

Analyse data. Work with AI.

From a business question to an analysis you can trust. In 6 weeks your employee moves from working with spreadsheets to their own AI agents and automations, and comes back with a **working report that refreshes itself**. Classes and materials are in Polish.

Starts 11 Jan 2027

one cohort, enrolment closes 10 Jan 2027

6 weeks online

approx. 6 h a week, recorded lessons

LIVE Tuesdays 7 pm

approx. 90 min, after work hours, recorded

■ 01 / WHAT YOUR COMPANY GETS

Same work, done a smarter way.

For people who work with data or make decisions based on it: analytics, BI, finance, marketing, operations.

01

An hour instead of a day

The report someone builds by hand every week now refreshes on its own, e.g. every Monday at 8 am.

02

Numbers you can trust

Every AI output gets checked: calculations, data completeness, metric definitions and conclusions.

03

Safe use of AI

Your employee knows which company data never goes into a chat. The agent has read-only database access, and business definitions stay with the team.

■ 02 / PROGRAMME AND LIVE DATES

PART 01 · FOUNDATIONS AND ANALYSIS WITHOUT WRITING CODE

WEEK 1 Foundations: from AI chat to a planned analysis 12 Jan · 7 pm**WEEK 2** How AI learns your company: context, instructions, tools 19 Jan · 7 pm**WEEK 3** Data analysis with AI, no code 26 Jan · 7 pm

PART 02 · AGENTS, POWER BI AND YOUR OWN SOLUTIONS

WEEK 4 Agents in practice: files, databases, workflow 2 Feb · 7 pm**WEEK 5** Power BI and your own AI analytics project 9 Feb · 7 pm**WEEK 6** Automation, monitoring and security 16 Feb · 7 pm

Each week: 5 recorded lessons and an assignment for a final project on the participant's own data. Times in CET, programme may be adjusted before the start.

■ 04 / HOW TO ENROL

1

Get in touch

Send your company details and number of people. We'll prepare a team offer.

2

Pay by transfer

We issue a pro forma, then a VAT invoice to your company.

3

Start on 11 Jan 2027

6 weeks, a final project and a personal certificate.

■ 03 / SKILLS AFTER THE COURSE

After 6 weeks, your employee:

- plans an AI-assisted analysis from business question to conclusion
- analyses Excel and CSV data, no code
- double-checks AI numbers before they reach the boss
- builds a Power BI report with every number explained
- sets up an agent, a schedule and an alert when results look off

■ 05 / INSTRUCTORS

KAJODATA

Kajo Rudziński

Founder of KajoData and KajoDataSpace. Ex-analyst, BI developer and data architect (Lufthansa, Zooplus).

NINJA DATA

Katarzyna Pęsik

Senior Data Scientist, previously an analyst at Lyreco Group and Amazon.

Want to bring AI into your team's data work?

Write to us. We'll prepare an offer and a pro forma invoice, so the purchase goes smoothly through your company.
